## 摘要

This Yearbook has been published by National Science Council (NSC) of the Executive Yuan annually since 1983. In 2005, Science & Technology Policy Research and Information Center (STPI) of the National Applied Research Laboratories (NARL) started to take over the publishing work. This Yearbook provides a comprehensive view of Taiwan's policies and measures in science and technology (S&T) development, and research achievements in S&T from the industrial, governmental and academic sectors in the country. It serves as a reference for the government to know S&T development trend in the country and to formulate S&T policies for the future. Moreover, it helps the individuals

and organizations within and outside the country to understand Taiwan's S&T development. English version of this Yearbook is released six months after the Chinese version to facilitate international exchanges of S&T information. The main contents are composed of "Special Reports" and three parts. "Special Reports" are topics about the important national S&T policy issues or remarkable achievements. The first part gives an overview of S&T policy, the performance indicators in the governmental funding and manpower investments, and R&D achievements. The second and third parts describe the S&T activities and achievements in the dimensions of "Basic Research" and "Applied Research and Technology Development". The full text of this Yearbook can also be found or downloaded on the Website (<http://yearbook.stpi.org.tw/index.html>)

## 目錄

pecial Reports

Report I : Six Emerging Industries — Recreating Prosperity

Report I-I : Taiwan Biotechnology Takeoff Diamond Action Plan

Report I-II : Outlooks on Taiwan's Tourism Development from "Project Vanguard for Excellence in Tourism"

Report I-III : Green Energy Industry Program

Report I-IV : Platinum Program of Health Care Upgrade Initiative — From Improving Medical Service Quality in Remote Areas to Medical Service Internationalization

Report I-V : Quality Agriculture Development Program

Report I-VI : Creative Taiwan — Development of the Cultural and Creative Industries

Report II : 2010 National Conference on Talent Cultivation

Part 1 Science and Technology Policy Overview

Chapter 1 Science and Technology Policy

Section 1 Science and Technology Development Organization

Section 2 Science and Technology Policy Formation and Objectives

Chapter 2 Overall Science and Technology Development Performance

Part 2 Science and Technology Activities and Achievements — Basic Research

Chapter 1 Natural Sciences

Chapter 2 Engineering and Applied Sciences

Chapter 3 Life Sciences

Chapter 4 Humanities and Social Sciences

Chapter 5 Science Education

Part 3 Science and Technology Activities and Achievements — Applied Research and Technology Development

Chapter 1 National Science and Technology Programs

Section 1 Networked Communications Program

Section 2 National Science and Technology Program for System-on-Chip

Section 3 National Science and Technology Program for Nanoscience and Nanotechnology

Section 4 National Science and Technology Program for Biotechnology and Pharmaceuticals

Section 5 National Research Program for Genomic Medicine

Section 6 Taiwan e-Learning and Digital Archives Program

Chapter 2 Life Science Group

Chapter 3 Environmental Science and Technology Group

Chapter 4 Information, Communications and Electronics Group

Chapter 5 Engineering Science and Technology Group

Chapter 6 Science and Technology Services Group

Chapter 7 Science and Technology Policy Group
